BG Customer Services: I met with Duncan Hart who is one of two Customer Services Officers. He is the BG liaison person who is the first port of call. He can then pass on the enquiry to the appropriate department for further help. He is visiting the area and the clubs and would also like to meet with the Technical Chairs. I suggested that we may be able to find a date for all Tech chairs to attend a meeting with him.

EGA: The board is anxious to embark on the development plan and initially a communications officer for the region is being sought. The plan is extensive and the region will need several volunteers to coordinate the implementation of the plan.

Regional Symposium: The date for this venture is June 12th 2016. At the last meeting there did not seem to be much enthusiasm for this venture. I seek further feedback from the committee if this is to go forward.

The BG disabilities department have asked for the disabilities reps for the technical committees.

Some nominations have been received for recognition at the Symposium. Thank you.

Trampoline Chair’s Report March 2016

The competition season is well underway. The Team event attracted 18 teams and was a great success. The numbers are changing between the Levels and grades. The schools competition was smaller than usual. The introduction of the Range and Conditioning has caused much discussion. The Regional Team Qualifier on March 13th 2016 will select the Regional team for the finals in May. The qualifiers will have to score 70% on the Range and conditioning test.

The workshops are arranged for April 30th at Fleming Park and applications are now coming in.

Southern Trampolining has agreed to pay the travel expenses for the Committee members attending the meetings.
