News from BG

At British Gymnastics our absolute aim is to deliver first class service and support to you, our customers, by better understanding your needs and actively supporting you to achieve your goals. We are strongest as a community when we all work together. We've made some exciting changes over the past few months, with our focus areas being shaped by the results of our annual Club Satisfaction Survey.

As you know, the Development department has been renamed the Participation department to better reflect what they are there to help you with. Since then the Area Manager and Club Development Coordinator posts have been restructured into new, focussed teams. They have been created to give you access to people who have the specific skills and knowledge to support you in the different areas of your club development. The four new teams are:

- The Facilities Team
- The Club and Partner Team
- The Participation Team
- The Disabilities Team

These teams are set up nationally to enable us to provide the expertise and support you need, no matter where you are located, at the time you need it. Support for your club can be accessed either by email to participation@british-gymnastics.org or by calling Customer Service on 0345 129 7129 ext. 2395. We will make sure you get to the right person in the right team to help you.

Facilities:

The development of gymnastics facilities is essential to help build capacity in the sport and enable more people to take part, whether that is extending current facilities, moving into bigger or better spaces or building new facilities from the ground up. The Facilities Team is a specialist group of officers who will work with clubs and partners to achieve successful facility developments through giving expert guidance and support at all levels and at all stages of the project.

Club and Partner:

Helping our clubs and partners to grow capacity and develop strong operations will help the sport to meet demand for participation and ensure this is sustained longer term. The Club and Partner Team have coordinators who are able to support your business needs. Activities they can help you with include Satellite Clubs, GymMark, improving time-tabling, business planning and workforce recruitment and development.

Participation:

Through continuing to build and develop the range of gymnastics activities, the Participation team will create wider and better opportunities for people to take part. They will continue to develop participation activities such as Freestyle, MyClub and GymFit, whilst supporting the development of a lower level competition and festival strategy for the UK. Coordinators will work with a range of partners to provide support in developing all types of gymnastics at a participation level and develop new opportunities to compete and perform.

Disabilities:

The introduction of the 'I'M IN' programme has helped to increase the support structure and number of clubs delivering inclusive disability activities. The Disabilities team are there to continue driving this to help provide and promote more opportunities for disabled people to take part in gymnastics.

We appreciate this is a big change but we are absolutely confident that it will be of great benefit to the whole community.
